

Job Description:

https://careers.adobe.com/us/en/job/ADOBUSR148753EXTERNALENUS/2025-Intern-E2E-Product-Management?utm_medium=phenom-feeds&source=LinkedIn&utm_source=linkedin

Elevator pitch: Hi, I'm Emily Han. I'm a junior at Washington University in St. Louis, double majoring in Finance and Computer Science. I'm passionate about solving real-world problems using technology, which led me to co-found my own startup project called Quture—a mobile app that allows users to exchange personal garments and define their style in the second-hand clothing space. Building Quture gave me first-hand experience in product development, from ideation to translating customer needs into functional features and my startup received \$10,000 in non-dilutive funding from WashU venture competition. My goal is to leverage cutting-edge technology to create impactful solutions that help consumers solve real-world problems and enhance their everyday lives at an innovative tech company.

Why good fit for the job: I am an ideal fit for this role as I bring a unique combination of entrepreneurial drive, technical skills, and strategic business insight. Founding my own startup gave me hands-on experience managing the complete product lifecycle, from conducting user interviews to collaborating with engineers to bring features to market. My internship at Mastercard, where I led data-driven consulting projects, further refined my analytical abilities and strategic mindset, equipping me to make informed, impactful decisions. With a strong foundation in both finance and computer science, I am adept at collaborating with engineers and cross-functional teams while aligning with business goals, positioning me to contribute effectively to Adobe's mission of developing innovative, user-centered products.
